

KEEP THE OCEANS CLEAN

NAVIGATE THE GALLERIES TO FIND THESE OBJECTS. DISCUSS THE QUESTIONS.

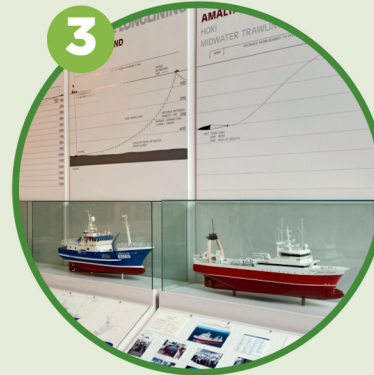

If we all worked to Refuse, Reduce, Reuse and Recycle we would help to keep our oceans and our world clean. Knowing how long it takes for rubbish to break down is important. By identifying items that cannot be easily reused or recycled you can avoid buying them in the first place.

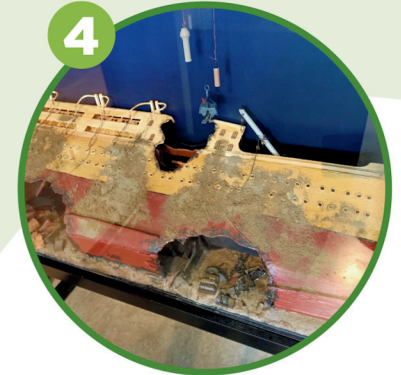

1 Which type of rubbish takes the longest to break down?

2 Most ocean plastic pollution is fishing gear. What are these hooks made from?

3 Talk with your team to plan a way of fishing that would not risk catching other animals, such as dolphins or seabirds.

4 Why might shipwrecks be so dangerous for the moana and marine life?

5 Who is this? What did they do to look after the ocean?

6 Whales help stop climate change, but they are being killed around the world. Think about what we could do to help them.

7 Find Vega and read about the amazing work she has done to protect our oceans.

8 What materials are used to build this waka?
