

# MAKE: OCEAN SLIME

Kia ora! I'm Marina, a Māui dolphin.  
Learn how to make ocean slime with me.  
It's bluey, ooey, gooey fun!

## WHAT YOU NEED:

- 1/2 cup Elmer's glue
- 1/2 tsp baking soda
- A drop of blue food colouring
- 1 Tbl contact lens solution
- 1 Tbl vegetable or baby oil
- Optional waterproof ocean toy's
- Measuring spoons
- Mixing bowl
- Stirring stick/spoon

## CREATE YOUR OCEAN SLIME

Follow the steps below with the help of an adult

### 1. Mix glue, baking soda & food colouring

For a slimetastic texture use 1/2 cup of Elmer's glue (clear or white), 1/2 teaspoon of baking soda and a drop of blue food colouring. Mix together until completely combined. You can also mix in a drop or two of scent at this stage.

### 2. Add contact lens solution slowly.

Contact lens solution is a child safe option that activates the mixture to turn it into gooey slime. Measure 1 tablespoon and add into the mixture in small increments while stirring. You know it ready when it starts to stick to itself and not the bowl.

### 3. Add baby/vegetable oil and mix.

Add approximately 1 tablespoon of oil, you can use any type of vegetable or baby oil, and mix with your spoon. This will stop the mixture taking to your hands or other surfaces. Before handing the slime for the first time add a bit of oil to your hands.

### 4. Add waterproof toy's.

Your slime mixture is ready but to make it the perfect ocean slime you now want to add your waterproof ocean toys. You can also fold in glitter.

## Your slime is complete!

Play with your bluey, ooey, gooey ocean slime.
